

TECHNOLOGY READINESS LEVELS FOR SOFTWARE

Level 1	Idea/concept sketches.
Level 2	Functional Requirements/Feature definition
Level 3	Wireframes/mock-ups of user interface
Level 4	Low fidelity MVP (minimally viable product/Alpha version)
Level 5	Works with or demonstrated with test data
Level 6	Developing high fidelity MVP/Designing System Architecture
Level 7	Testing with field data
Level 8	Customer trials – high fidelity with real data
Level 9	Scalable back end/ Performance/Operational SaaS/ Data Centre/Security Model
